-------------------------------------	-------------------------------------	------	----------	------------

HIGH LIGHT EFFICIACY **200 lm/W**

Injection molding plus ultrasonic welding technology. Integrated transparent 170° optic lens.

Features:

- Powered by high output 2835 LED
- Constant current
- 20 psc per string
- CE, RoHS, UL, TUV, BIS, CB and LM-80 certified

Applications

Apply to 4-15 cm depth illuminate letter or light box at airports, metros, bank, buildings and shopping malls, etc.

Installation guidance

	<p>1 Clean inside the light box</p>		<p>5 Strip the end wire for 10 mm and cap with the wire connector. Waterproof and anti-corrosion must be done on the connectors.</p>
	<p>2 Determine the appropriate layout</p>		<p>6 Adjust modules to the optimal position and secure with screws ⚠ Note: Avoid breaking the module and wire when fixing with a drill</p>
	<p>3 Peel tape backing and stick modules into place</p>		<p>7 Drill a hole for connecting power cable. Fixation and protection for the cable must be done on the hole. ⚠ Note: Avoid breaking the light box in drilling the hole</p>
	<p>4 Remove the unneeded modules ⚠ Note: Cut in the middle position of the wires between modules</p>		<p>8 Connection to the power cable and make sure that the polarity for connection is correct ⚠ Note: Red wire is positive and black is negative</p>

Instructions

- Disassembling or modifying the product is forbidden.
- Installation with power on is forbidden.
- Any organic solvent chemical is forbidden.
- Acidic or alkaline adhesive is forbidden when install, neutral glass cement could be used for installation purpose, make it drying in open environment for four hours.
- Isolation and corrosion prevention on all wiring points and wire ends.
- Make sure the power wire is thick enough and ensure the voltage and connections are connected correctly before power on.
- This product should be used in a sign, do not expose it in opening site.
- Installation, maintaining should be done by professional staff.
- 20 pcs in a serial connection maximum.
- The power wire between power supply and module should be less than two meters to keep the same brightness on all parts.
- Initial location with 3M tape, then secure with screws.

Declaration

- Warranty: 5 years.
- In order to ensure the safety, the broken wires need to be replaced by the manufacturer or the service agent or by the staff with the similar qualification.
- The given data in the specification was based on the laboratory testing, there may be discrepancy found in the actual products.
- The given drawings in the specification are only for reference, there may be discrepancy found in the actual products.
- The products are subject to change without prior notification.
